

The Night Vision Battery Pack is a lightweight, low-profile power solution designed to maximize reliability and runtime in the field.

Built around a simplified, no-nonsense architecture, it houses two CR123 batteries to deliver extended operational life while maintaining a compact footprint that stays out of the way during movement. Despite its minimal form factor, the battery pack remains fully compatible with stackable weighted plates, allowing users to fine-tune counterbalance on their helmet setups without added bulk. Proudly made in the USA, the Night Vision Battery Pack provides dependable power, streamlined ergonomics, and real world durability for demanding night vision applications.

NIGHT VISION BATTERY PACK FEATURES

- LIGHTWEIGHT & SIMPLIFIED
- WEIGHTED PLATES TO INCREASE WEIGHT FOR COUNTERWEIGHT
- LIFETIME WARRANTY (SEE WARRANTY TERMS & CONDITIONS)
